

Relay and McLeod streamline payments for fleets and brokers

Relay's integration allows carriers and brokers to completely automate their lumper payments in McLeod's TMS, resulting in a quicker and more effective process.

Benefits of the Relay & McLeod Lumper Integration:

- ✓ Eliminate late night calls by automatically generating RelayCodes for your drivers to use at warehouses
- ✓ Improve the driver experience by providing an easy-to-use payment method that saves time on dock
- ✓ Mitigate the risk of fraud by using secure digital payments
- ✓ Improve back office operations by receiving instant receipts in McLeod that are allocated to the right load

Dedicated Customer Success Manager

Transparent Fees

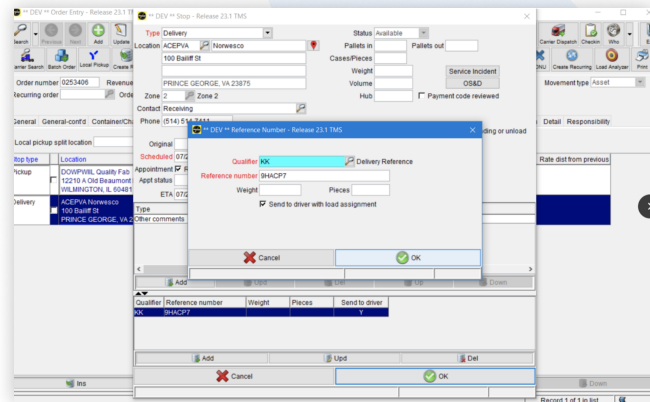

Many of our customers were already using Relay, so this integration was a priority for us. Relay has been a great partner to work with every step of the way, and we're excited to launch Relay's lumper payment functionality into our TMS, delivering a seamless experience for our carrier and broker customers.

Generating RelayCodes

Upon assigning a driver or carrier to a load, a RelayCode is automatically created for all Relay-enabled locations and displayed in McLeod as a reference number on the stop.

A RelayCode is automatically generated in McLeod

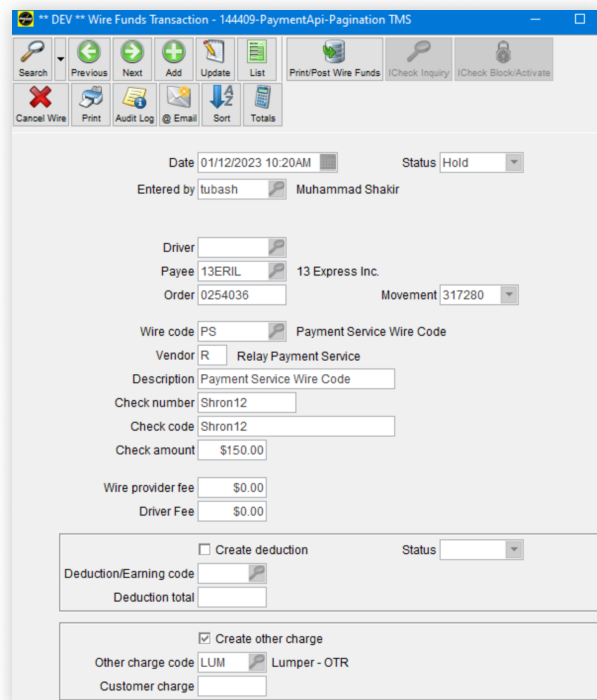

Sending codes to drivers and carriers

The RelayCode can be sent to drivers and carriers in a few ways, including:

- ZMIT to the driver through the McLeod Driver App or ELD integration
- Including the RelayCode on the RateCon to carriers
- Sending a text or email to the driver through the Send Message feature

Capturing lump sum amount and receipts

- When a RelayCode is used, the lump sum amount and receipt will instantly appear on the History tab of the order in McLeod.
- The lump sum amount will also be added to the order as a wire code charge.
- If you have third-party image capture, the receipt is automatically indexed and doc typed to the Images tab on the order, which allows the receipt to transfer to billing for reimbursement.
- If you do not have third-party image capture, Relay can automatically send the receipts to a DocumentPower remote inbox via email, and you can manually index them to the order and select the doc type.

The lump sum charge is added in McLeod
