# RELAY + TURVO

MY LUMPER CODE
JSM7N2

streamline payments for fleets and brokers

Relay's integration allows brokers to completely automate their lumper payments in Turvo, resulting in a quicker and more effective process.

- ⊙ **LUMPER CODE USED**
- 🏢 Lineage Warehouse
- ✓ Payment Confirmed
- ✓ Receipt Generated & Saved

Benefits of the Relay & Edge TMS Lumper Integration:

✓ Eliminate late night calls by automatically generating RelayCodes for your drivers to use at warehouses

✓ Improve the driver experience by providing an easy-to-use payment method that saves time on dock

✓ Mitigate the risk of fraud by using secure digital payments

✓ Improve back office operations by receiving instant receipts and charges in Turvo that are allocated to the right shipment

RELAY BENEFITS

- ✓ Relay analyzed more than 500K transactions to determine that the average lumper fee is $175

- ✓ An average of 10% of all lumper fees are not reimbursed due to lost receipts

- ✓ With Relay, users get off the dock at least 20 minutes faster

- ✓ If your company makes 1,000 lumper payments a year, that's a savings of $17,500 annually

- ✓ Added time savings: drivers spend 45+ minutes on dock when paying with cash and checks

- ✓ With Relay, users get reimbursed 100%

Turvo Integration

GENERATING RELAYCODES

RelayCodes are automatically created at Shipment entry for all Relay matching locations once the Shipment is in Covered status

SENDING CODES TO CARRIERS

The RelayCode can be sent to the carriers by adding the notes field to the rate confirmation

CAPTURING LUMPER AMOUNT AND RECEIPTS

• After a payment has been completed using the LumperCode, the charge and receipt will come into Turvo. The charge will be added to the Payments and Deductions screen as well as the Billing screen

• Receipts will be retrieved and included in the shipment documents. These receipts will be stored as document type Lumper Receipts
